

## Recovery Monitoring for Success

Rebuilding trust and confidence is made easier by careful random testing. Research shows that comprehensive monitoring lowers the chance of relapse, builds accountability, and supports positive change.

- Thousands of testing sites nation-wide
- Comprehensive test panels (urine, hair/nail and blood)
- Random and on-demand testing
- Web-based notifications for participants
- End-to-end Chain-of-Custody management
- Timely delivery of information to case management staff, ensuring accountability
- Medical Review Officer (MRO) services by nationally recognized and certified physicians
- Confidentiality and security

Our monitoring and case management services can also be configured to include:

- 12 Step meeting attendance
- Outpatient therapy attendance
- Employer-mandated services
- Phone check-ins by case manager

Tests are done on a randomized schedule, with thousands of collection sites nationwide. Participants go online 6 days per week to receive notification for their random test through Affinity eHealth. Case management services are utilized for monitoring test results, for support calls to participant or family, and for verification with other providers, as requested.

## Fee Schedule

- Program initiation with case manager: \$150
- Screening tests start at \$85 (plus \$10 collection fee)
- Case management services (as needed): \$25 per ten-minute increment

You may also want to consider Structured Family Recovery, a professionally-led program that guides the family through the early months of the addiction recovery process. Structured Family Recovery™ is facilitated through weekly conference calls, following the program laid out in [It Takes a Family](#). SFR is a simple and effective way to help avoid relapse, and create a foundation of recovery in the whole family.
